The main purpose of this paper is to construct partial twisted zeta-type function, which interpolates q -generalized Frobenius-Euler numbers and twisted q -generalized Frobenius-Euler numbers. We give some applications related to this function.

2000 Mathematics Subject Classification. 11S40, 11S80, 11B68, 30B50, 44A05.

Key Words and Phrases. Euler Numbers, twisted q -Frobenius-Euler Numbers, twisted q -Frobenius-Euler polynomials, twisted q -zeta function, twisted q - l -function.
